SUMMARY

Motivated Electrical Engineering undergraduate (2nd year) with strong academic foundation. Hands-on experience in circuit analysis, MATLAB/Simulink, and embedded C programming. Adept at workflow automation using APIs and n8n for digital efficiency. Strong interest in renewable energy, electric vehicles, and smart grids. Creative in digital branding and content creation, actively building a unique YouTube Shorts channel. Seeking internship opportunities to apply technical expertise and innovative problem-solving in future-proof energy domains.

EXPERIENCE

Intern

Jun 2025 – Jun 2025

Western Central Railway , Kota , Rajasthan - Internship

- Gained practical exposure to electrical systems and railway infrastructure, including power distribution and maintenance processes.
- Observed and assisted in the operation of signaling systems, traction motors, and control circuits.
- Developed insights into real-world applications of electrical engineering concepts such as circuit analysis, embedded systems, and energy efficiency.

PROJECTS

Bluetooth Controlled Car

Feb 2025 – Feb 2025

- Designed and built a car prototype controlled via a smartphone using Bluetooth communication.
- Integrated Arduino microcontroller with motor driver circuits to enable wireless control of movement and direction.
- Developed and tested a mobile app interface for sending commands, ensuring smooth connectivity and real-time response.
- Applied knowledge of embedded C programming, circuit design, and sensor integration to enhance functionality.
- Strengthened teamwork and problem-solving skills by collaborating with club members on design, debugging, and testing.
